

Achieve the best in lighting!

MASTER Color  Elite

Excellent natural colors,
constant and more light

PHILIPS

New MASTER Color

One light source, unlimited possibilities

The new MASTER Color Elite is a breakthrough innovation in CDM technology. Philips was the original inventor of CDM technology 10 years ago. While the new MASTER Color Elite is designed with the same cap and dimension as its predecessor CDM-T/TC, it opens a new world of exciting possibilities.

- A new level of crisp, natural colors
- Constant light output over life
- Increased light output
- Dimming with excellent white, crisp light

Higher color rendering means that you achieve true colors. Constant light output over life means a consistent bright lively atmosphere, even while the lamps age. The MASTER Color Elite was designed to give the best performance in combination with Philips HID-PrimaVision electronic gear*. For the ultimate dimming performance, the ideal partner is the new Philips I-10V or DALI dimming gear. This system enables you to dim lighting levels to 60%. This means you have the freedom to create dynamic atmospheres and it also helps to save energy. All this, plus the reliable performance you expect from MASTER Color technology.

** In case the lamps are run on conventional gear, no safety problem will occur. However, the performance (mainly color spread and with electromagnetic gear as usual life-time, color deterioration over life, flicker) might not be as good as electronics. For more detailed information please ask for an OEM guide.*

Applications - suitable for indoor and outdoor

- Retail lighting
- Architectural lighting
- Residential lighting
